

Note on Availability of Accessible Versions of 56 Titles Cited by Yochai Benkler in *The Wealth of Networks*.

Meredith Filak, Knowledge Ecology International

April 22, 2009

My name is Meredith Filak. I am a recent graduate of the University of Chicago, currently working at Knowledge Ecology International as a research fellow. In an attempt to gauge the availability of specialized books in accessible formats for the blind, I performed a sample study by searching for books cited in the notes of a single book, Yochai Benkler's *The Wealth of Networks: How Social Production Transforms Markets and Freedom*.¹ Due to the unique issues posed by access to books, I focused exclusively on cited books and did not include journals, websites, or newspaper articles in my research.

I searched for works across the five largest English-language Accessible Books databases in three countries: Recording For the Blind and Dyslexic (RFB&D), the National Library Service for the Blind and Physically Handicapped (NLS), and BookShare.Org in the United States; the books database at the Canadian National Institute for the Blind (CNIB); and the library database at the Royal National Institute of Blind people (RNIB) in the United Kingdom. "Accessible format" was defined as any format allowing the use of assistive technology, and included braille, electronic braille, DAISY, downloadable audio, CD audio, HTML and text formats. All books were checked against all five databases twice; once for title, and once for author, to avoid any possible errors in the databases' titles.

Of 56 books cited in the *Wealth of Networks*, 11 (19.6%) were available in reading-accessible formats, and only one was available under a global license – *Free Culture* by Lawrence Lessig. In Canada, only two books (including *Free Culture*) were available to reading disabled persons. In the UK, two books (again including *Free Culture*) were available for reading disabled persons. All 11 available books were available through at least one of the three American sources.²

The 45 remaining books (80.4%) were unavailable in any of the five leading sources of English language works.

Below is the complete list of cited books. The first table lists those books available through one or more of the five sources, and notes the particular format in which each book was made available. The second table lists those which were only available in an edition or compilation separate from the one cited by Benkler. Finally, I report the titles of the 45 works that were not available from the five leading English-language sources for accessible format books.

1 The author, Yochai Benkler, has made *The Wealth of Networks* available in a variety of formats and licenses, including the Creative Commons non-commercial attribution license for a PDF version of the original book, but it is not available from any of the five sources in formats specifically designed for accessibility for reading disabled persons.

2 Of these, 2 were found in alternate editions or compilations, different from Benkler's citation.

Books Available in Accessible Formats

Work	RFB&D (US)	NLS (US)	BookShare (US)	CNIB (CA)	RNIB (UK)
Bruce A. Ackerman, <i>Social Justice and the Liberal State</i> , 1980	DA, CD	CD
